### Thematic plan of practical classes
#### IN TRAUMAtology AND ORTHOPEDICS

<table>
<thead>
<tr>
<th>№№</th>
<th>Topic</th>
<th>Hours</th>
<th>Modular content</th>
</tr>
</thead>
</table>
1. Introduction to the profession. Features survey of orthopedic and trauma patients.

5

2. Degenerative-dystrophic diseases of joints.
3. Inflammatory joint diseases.

4. Diseases of the spine (congenital and acquired).
5. Injuries of upper extremity (Damage to the shoulder girdle)

6. Military trauma
Damage to the spine and pelvis. Traumatic disease, multiple trauma.

Modular content
Military trauma

Lower extremity injuries.
THEMATIC PLAN and questions to the lectures in TRAUMAtology AND ORTHOPEDICS

I. Introduction to the profession. Trauma care, polytrauma.
Modern principles of treatment and rehabilitation of patients with lesions of the musculoskeletal apparatus.

1. The contribution of local scientists in the development of traumatology and orthopedics. Orthopedic and trauma education in Ukraine.
2. Trauma injuries. Types of injuries.
5. Classification of fractures. Modern principles of treatment. Based on the symptoms of which can establish the diagnosis of a fracture?
10. Damage in the field of ankle-stage joint. The clinic, diagnosis, treatment.
II. Congenital malformations of the musculoskeletal apparatus.

1. Etiology, pathogenesis, clinical signs of congenital muscular torticollis.
2. Conservative and surgical treatment of congenital muscular torticollis, indications and methods.
3. The definition of "scoliosis" and classification of scoliosis with etiology.
4. Pathogenesis of scoliotic disease, its extent and clinical features.
5. Basic principles of early recognition of scoliotic disease.
11. Likuvannya before hip dislocation in newborns, the first year of life and children over 3-4 years.
12. Kliniko-roentgenological diagnosis of congenital hip dislocation before the age of 1 year.
13. Osoblyvosti treatment of congenital hip dislocation in different age groups.
Treatment for congenital clubfoot

15. Consrvatuvne, its methods and indications.

16. The surgical treatment of congenital clubfoot, its methods and indications.

III. Degenerative-dystrophic diseases of the spine and joints.

   articular cartilage (histology and biochemistry).
2. Aseptic necrosis of the femoral head (ANHSHK).
   Classification, clinical picture, diagnosis, treatment.
4. Forms dystrophic-degenerative lesions of joints.
5. Anti-inflammatory drugs used to treat OA.
   Classification, mechanism of action.
6. The principles of conservative and surgical treatment of OA.
7. Osteochondrosis. Pathogenesis, clinical picture,
IV. Specific and nonspecific inflammatory diseases of the joints.

1. Classification of inflammatory joint disease
2. Reactive arthritis. The clinic, diagnosis, treatment.
3. Specific inflammatory joint diseases (bacterial arthritis, tuberculosis of bones and joints).
4. Tuberculosis of bones and joints. The clinic, diagnosis, treatment.
5. Nonspecific inflammatory diseases of the joints (rheumatoid arthritis, psoriatic arthritis, deviation, ankylosing spondylitis, etc.)
7. Rheumatoid arthritis. Classification, the stage of activity, functional failure of the joint.
8. Rheumatoid arthritis. Clinic on stages in the course.
10. Ortopedychna prevention of contractures and deformities in RA.
V. Tumors diseases of the musculoskeletal apparatus

1. Determination of tumor (benign, malignant).
2. Classification of tumors.
5. Benign tumors of connective tissue.

Thematic plan of the extracurricular STUDENT’S WORK.
Multiple trauma. Classification, clinic,
diagnostics, treatment

3

Crush-syndrome

Osteocho
ndropathy. Classification.
Diagnostics, treatment
5
